

BIJITATMA NANDA SAHU

bijit01012000@gmail.com | +91-6370164887 | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

Skills

Programming Languages: C++, JavaScript, Java, TypeScript, SQL

Databases: MySQL, MongoDB, Redis

Libraries / Frameworks: ReactJS, NextJS, NodeJS, ExpressJS, Mongoose

Tools / Platform: Github, Vercel, VS Code, Figma, Notion

Work Experience

Candescent (Previously part of NCR Corporation) | SWE 1

Jul '23*

- Engineered the **iSAT** application, a robust system that managed over **10,000 testing parameters** and business attributes, and slashed testing process time by **90%** with automation.
- Conceptualized and constructed a **real-time analytics dashboard**, which visualized key execution metrics and generated reports that decreased manual reporting efforts by **70%** across stakeholders.
- Reduced the duration of CAB testing from **1 month to 3-4 days**, significantly accelerating the product certification process for digital banking solutions provided to **over 500 banks** across the US and Europe.
- Technologies used:** ReactJS, SpringBoot, NodeJS, MySQL, MongoDB, JWT Authentication, Azure VMs

Sezzle India (Remote) | Frontend Developer Intern

Jun '22 - Jul '22

- Contributed in **migrating** the codebase to **ES6 Javascript**, helping modernize the platform and improve code efficiency.
- Worked on implementing the **Payment Page** and **Address Page** frontend, focusing on responsiveness and seamless user experience.
- Technologies used:** ReactJS, Javascript(ES6), Styled Component

Projects

Job Tracker V2 | [Link](#) | [GitHub](#)

Feb '25

A Job tracking application for seamless management of job applications with advanced features.

- Implemented secure user authentication and profile customization via Clerk, enabling users to track and categorize **200+** job applications and supported over multiple screen sizes.
- Technologies used:** Next.js 14, TypeScript, Tailwind CSS, Clerk, Prisma

TravelMate AI | [Link](#) | [GitHub](#)

Sep '24

Developed a chatbot feature using OpenAI within the Next.js application providing real-time tour recommendations.

- Architected a full-stack Next.js application **integrating OpenAI API** to generate personalized city tour itineraries based on user preferences, resulting in 50+ users within the first month.
- Technologies used:** Next.js 14, React Query, TypeScript, Tailwind CSS, Clerk, Prisma

Job Tracker V1 | [Link](#) | [GitHub](#)

Jul '21

A MERN stack application for tracking and managing job applications efficiently.

- Engineered a **MERN** stack job tracking app, featuring secure **user authentication**, which empowered users to effectively track application trends through monthly stats, leading to improved organization and insights for 100s of job seekers.
- Technologies used:** ReactJS, NodeJS, ExpressJS, MongoDB Atlas, JWT

Education

NIT, Rourkela

Aug '18 - Jun '23

Metallurgy and Materials Engineering

CGPA: 8.05/10

Relevant Coursework: Object Oriented Programming, Database Management Systems, Data Structures and Algorithms, Operating Systems, Computer Networks, Distributed Systems

Awards and Certificates

- Teaching Assistant at Coding Ninja
- 575th Rank on Google kickstart 2020
- Machine Learning and Deep Learning Specialization on Coursera
- Full Stack Web development bootcamp on Udacity
